May 18-65

1. Timing of mtg - depends upon
 area - could pick area - do a kind of
 "model" report on single area - solicit
 CDRB guidance & comments -
 proceed accordingly

Chairman - distributed guide questionnaire
 for comment. Distribution - mail & hand
 carry. Agreed - to use as guide & notes taking
 record. Reasons for lack of consultation = ?

Policy real possibility & Lack of Area Commis-
 ion org - Work Off - Area Specialist - Functional
 Specialist - creates number of people, distinctions
 between initial contact them or relations - is

direct continuing person-to-person.

Organizational structure affects the common problem (Other factors - nature of analysts re-sponsibilities). Operating relationships of the community - Existing - vs. Should operations.

Any structure aspect - new dolphin -
Task Force reduces common ^{problem} for crisis -
common problem ~~for~~ primarily is in standard
or routine activities rather than crisis sit.

Agreed to review the and add - and
bring to next meeting. Aim of the same
today - to agree on the area - most
still from SA - even though many are too damn
busy to talk to anybody. Don't keep people only
small slice of total SA contingent. Bring to

not meeting rough outline of work organization & exchange. Tentatively agreed on LA as first area to explore. ~~Multiplicity of factors~~ That and check out reception if we move into LA. Agreed to multiplicity of factors affecting analyst common problems — do we have several problems — not just one? — non-generalized problem definition.

Next meeting Tuesday \Rightarrow 10:30 —
Langley. Main aim of forum —
contribution

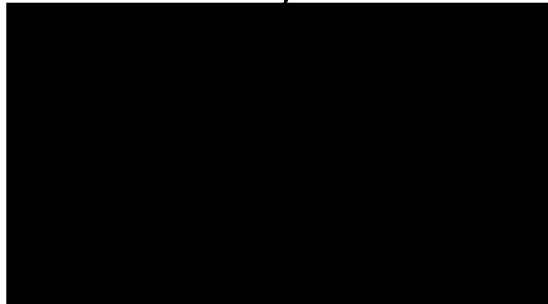

Minutes back to him — authorship to
Pete Munger & Leonard de
up to them

Common ProblemsApril 6 '65

I. Membership -

PI vs CI - sticks to CI - initially

STATINTL stick to general analytic common problem -

[REDACTED] - why cut off common with sector
(S&T) with which and wherein common such

STATINTL a problem. [REDACTED] - cover thru DIA S&T Directorate

STATINTL S&T (DIA) should have rep to group -

STAT [REDACTED] Can handle for CIA (S&T) -

[REDACTED] - (cut back problems to a couple cases
or samples) - main purpose should was to see

if DIA could contribute or should be on Team.

Sed suggests Washington area for defining area of STATINTL

STATINTL inquiry. [REDACTED] - Keep Terms Broad. [REDACTED]

- to see if CI needed on Team -

State has directory - ref I(B) - could
security be surmounted (DDP) - (STATE
Pol Desk) DDA problem - who's who in
what field - principal of single points of con-
tact - avoids tasking each other inadvertently.
Analyst-to-Analyst ~~and~~ - personal basis works
fairly well - prob in given field - problem a-
rises when you need to go outside your field.
usually on single problem basis - and handled on
fairly satisfactory basis. A to A Comms + machines
STATINTL Analyst feeling as to who is worth talking to -
 - liaison with strange shops - i.e., State
should house a DDA liaison type ~~group~~ ~~by~~ groups
same as Comms prints - As analysts have

freedom of choice in Commu? Estimates, etc? STATINTL

[redacted] - had a computer to Commu. [redacted] - how

do analysts communicate? What devices? OBT =

over NIE coordination - assure minimal commu - STATINTL

[redacted] - where - what looks - good commu exists -

geo areas commu good - - or poor - IIA, JON,

SR - good - interest [redacted] might be the point STATINTL

also field - Counter Insurgency - all hands know

appropriate number - [redacted] said this not his STATINTL

cup of tea & left early. ONI rep in gen-
eral - agreed that new memberships

DIA - CIA - STATE - combine &

call for help from operating departments

Turns approved - await COWB ap -

proposal - tentatively explore possibility
of concentrating on L.A. as initial area.
